

CASE STUDY 2: Binarch's SharePoint work to a IT Infrastructure Management Company

The Service Provider License Agreement (SPLA), designed by Microsoft is a simple pay-as-you-go subscription model to all service providers and Independent Software Vendors (ISV) who offers Software as a Service (SaaS). SaaS is billed on a per user per month basis. Our client who is an IT Infrastructure Management Company provides Microsoft SPLA Licenses to its Partners. All the Processes involved in licensing are automated in this Project. HR management tasks of the IT Infrastructure management company are also implemented in this project.

KEY FEATURES:

- SPLA Purchase Order Management
- SPLA Invoicing
- Price List Management
- Multi Currency Support
- Partners Management
- Enquiries, News, Uploads, Downloads
- Reports
- HR Modules – Leave management, TA, Conveyance management, Pay slips
