

CASE STUDY 4: Binarch's SharePoint work to a Pharmaceutical Company

Given solution was unique of its kind which allows Pharmaceutical company employees to network or know each other by logging in to SharePoint portal. The solution was part of 'MOSS My Site' feature which is a personal site that gives a central location to manage and store documents, content, links, and contacts. My Site & Know your colleague module serves as a point of contact for other users in the organization to find information, skills and interests of each other Employees.

KEY FEATURES:

- **User Profile Search:** Allows users to discover and learn more about the people they work with and to see how everyone fits in the company.
- **Organization Charts:** Organizational charts make it easier for people to understand employee hierarchy within company.
- **Access to non- AD users:** Non-AD users also have access the features in SharePoint portal for which they have access privileges.
- **Easy to Navigate:** Navigating to search results made very user friendly as search results will be shown with the categories, departments in a tree structure.
- **Secure & Role based:** The access to edit the personal User Profile is secure and role based.
- **Viewable & Editable Profile fields:** The Admin can decide and set the User Profile fields which can be viewed & edited by users
